

Neuxpower Accessibility Conformance Report

WCAG Edition

(Based on VPAT® Version 2.5Rev)

Name of Product/Version: NXPowerLite Desktop (Windows) v11.0.1

Report Date: 14 August 2026

Product Description: Compress PDF, JPEG, PNG, TIFF, Word documents, Excel spreadsheets and PowerPoint presentations with NXPowerLite Desktop. Files remain in their original format, with no discernible loss of quality. Files remain in their original format, with no discernible loss of quality - and there's no need to unzip before using them. It's incredibly easy to use. Simply select a file, choose your optimization level and click the 'Optimize' button. If you use Classic Outlook it's even easier. NXPowerLite Desktop will automatically optimize email attachments as they are sent.

Contact Information: support@neuxpower.com.

Notes:

Evaluation Methods Used: Manual testing using keyboard-only navigation and Windows Narrator, supplemented by automated and manual UI inspection using Microsoft Accessibility Insights for Windows. Evaluated using WCAG2ICT guidance.

Applicable Standards/Guidelines

This report covers the degree of conformance for the following accessibility standard/guidelines:

Standard/Guideline	Included In Report
Web Content Accessibility Guidelines 2.0	Level A (Yes) Level AA (Yes) Level AAA (Yes)
Web Content Accessibility Guidelines 2.1	Level A (Yes) Level AA (Yes) Level AAA (Yes)
Web Content Accessibility Guidelines 2.2	Level A (Yes) Level AA (Yes) Level AAA (Yes)

Terms

The terms used in the Conformance Level information are defined as follows:

- **Supports:** The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.
- **Partially Supports:** Some functionality of the product does not meet the criterion.
- **Does Not Support:** The majority of product functionality does not meet the criterion.
- **Not Applicable:** The criterion is not relevant to the product.
- **Not Evaluated:** The product has not been evaluated against the criterion. This can only be used in WCAG Level AAA criteria.

WCAG 2.x Report

Note: When reporting on conformance with the WCAG 2.x Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported ways of using technology as documented in the [WCAG 2.0 Conformance Requirements](#).

Table 1: Success Criteria, Level A

Notes:

Criteria	Conformance Level	Remarks and Explanations
1.1.1 Non-text Content (Level A)	Supports	All icons and non-text elements (such as command bar options) are accompanied by descriptive text tooltips or labels.
1.2.1 Audio-only and Video-only (Prerecorded) (Level A)	Not Applicable	The application does not contain prerecorded audio or video content.
1.2.2 Captions (Prerecorded) (Level A)	Not Applicable	The application does not contain Captions
1.2.3 Audio Description or Media Alternative (Prerecorded) (Level A)	Not Applicable	The application does not contain Audio Description or Media Alternative
1.3.1 Info and Relationships (Level A)	Supports	The interface uses standard UI controls that expose their relationships programmatically. The tab navigation order proceeds in a logical sequence that preserves the meaning and operability of the interface.
1.3.2 Meaningful Sequence (Level A)	Supports	As above.
1.3.3 Sensory Characteristics (Level A)	Supports	Instructions and functional workflows within the application do not rely solely on sensory characteristics (such as shape, size, visual location, orientation, or sound) to be understood or operated. For example, users are not instructed to "click the round button on the right," but rather interface elements are identifiable by clear text labels (e.g., "Optimize") and standard programmatic names.
1.4.1 Use of Color (Level A)	Supports	Color and shape are not used as the sole visual means of conveying information. For example, file status/error states use color-coded icons (e.g., a red cross) paired with explicit descriptive text (e.g., "Internal error").
1.4.2 Audio Control (Level A)	Not Applicable	The criterion is not relevant to the product. The application contains no automated audio.

Criteria	Conformance Level	Remarks and Explanations
2.1.1 Keyboard (Level A)	Supports	The application's core workflow (selecting files, choosing optimization levels, and processing) is fully operable via standard keyboard interfaces (Tab, Space, Enter, Arrow keys). Additionally, shell integration features (Explorer right-click menu) support keyboard accelerators and shortcuts.
2.1.2 No Keyboard Trap (Level A)	Supports	Keyboard focus is not trapped within any application control or dialog. Users can navigate into and out of all controls using standard keyboard keys (Tab, Shift+Tab, Arrow keys).
2.1.4 Character Key Shortcuts (Level A 2.1 and 2.2)	Not Applicable	The application does not use single-character key shortcuts.
2.2.1 Timing Adjustable (Level A)	Not Applicable	The criterion is not relevant to the product. The application does not contain timed sessions.
2.2.2 Pause, Stop, Hide (Level A)	Not Applicable	The criterion is not relevant to the product. The application contains no automated audio, timed sessions, moving/blinking content, or flashing elements.
2.3.1 Three Flashes or Below Threshold (Level A)	Not Applicable	The criterion is not relevant to the product. The application contains no automated audio, timed sessions, moving/blinking content, or flashing elements.
2.4.1 Bypass Blocks (Level A)	Not Applicable	According to WCAG2ICT guidance, this criterion typically applies to web pages with repeated navigation blocks. As a focused desktop application, NXPowerLite Desktop does not contain web-style repeated blocks of content, making this criterion not applicable.
2.4.2 Page Titled (Level A)	Supports	All main application windows and sub-dialogs (e.g., "NXPowerLite Desktop 11", "Edit Optimize Profile") have clear, descriptive titles in their window title bars that communicate their purpose.

Criteria	Conformance Level	Remarks and Explanations
2.4.3 Focus Order (Level A)	Supports	When navigating via the Tab key, the focus moves sequentially in a logical order that preserves meaning and operability.
2.4.4 Link Purpose (In Context) (Level A)	Supports	Text links within dialogs (such as "How do these settings affect my files?" and "Troubleshooting tips") clearly indicate their purpose and destination from the link text alone.
2.5.1 Pointer Gestures (Level A 2.1 and 2.2)	Supports	The application does not require complex or path-based pointer gestures. All click actions are triggered on the "up-event" (release of the mouse button), allowing users to cancel an action by moving the pointer away before releasing.
2.5.2 Pointer Cancellation (Level A 2.1 and 2.2)	Supports	As Above
2.5.3 Label in Name (Level A 2.1 and 2.2)	Supports	The programmatic accessible name of user interface components (such as standard Windows buttons and checkboxes) matches or contains the text that is presented visually on the screen.
2.5.4 Motion Actuation (Level A 2.1 and 2.2)	Not Applicable	The application does not require device motion to operate.
3.1.1 Language of Page (Level A)	Supports	The application is localized into 14 languages using standard Windows resource (.rc) files. The software automatically matches the user's operating system UI language, allowing assistive technologies to apply the correct pronunciation rules.
3.2.1 On Focus (Level A)	Supports	Navigating to a control (focus) or modifying its value (input) does not trigger unexpected context changes, such as automatically submitting a form or launching new windows.
3.2.2 On Input (Level A)	Supports	As Above
3.2.6 Consistent Help (Level A 2.2 only)	Supports	The application provides a standard "Help" menu within the main menu bar, ensuring access to support resources remains in a consistent visual location. Additionally, the software consistently supports the

Criteria	Conformance Level	Remarks and Explanations
		standard F1 keyboard shortcut to launch context-sensitive help documentation across different dialogs and workflows.
3.3.1 Error Identification (Level A)	Supports	Processing and input errors are explicitly identified and described to the user in text.
3.3.2 Labels or Instructions (Level A)	Supports	Controls, input fields, checkboxes, and dialog options are clearly labeled with visible descriptive text and keyboard mnemonics.
3.3.7 Redundant Entry (Level A 2.2 only)	Supports	The application does not require users to re-enter information they have previously provided within the same process. Configurations, file selections, and output preferences are retained during the workflow without requiring redundant data entry.
4.1.1 Parsing (Level A) WCAG 2.0 and 2.1 – Always answer ‘Supports’ WCAG 2.2 (obsolete and removed) - Does not apply	Supports	For WCAG 2.0 and 2.1, the September 2023 errata update indicates this criterion is always supported. See the WCAG 2.0 Editorial Errata and the WCAG 2.1 Editorial Errata .
4.1.2 Name, Role, Value (Level A)	Supports	User interface elements expose the correct name, role, state, and value properties to assistive technologies, verified via Windows UI Automation testing.

Table 2: Success Criteria, Level AA

Notes:

Criteria	Conformance Level	Remarks and Explanations
1.2.4 Captions (Live) (Level AA)	Not Applicable	The criterion is not relevant to the product. The application does not contain Captions (Live).
1.2.5 Audio Description (Prerecorded) (Level AA)	Not Applicable	The criterion is not relevant to the product. The application does not contain live/prerecorded media.
1.3.4 Orientation (Level AA 2.1 and 2.2)	Not Applicable	The criterion is not relevant to the product. The application does not enforce mobile device orientations.

Criteria	Conformance Level	Remarks and Explanations
1.3.5 Identify Input Purpose (Level AA 2.1 and 2.2)	Not Applicable	The criterion is not relevant to the product. The application does not collect personal data requiring autocomplete.
1.4.3 Contrast (Minimum) (Level AA)	Partially Supports	The majority of text within the application meets the 4.5:1 minimum contrast ratio. However, standard text within highlighted rows in lists and dropdowns (using standard system accent colors) achieves a contrast ratio of 4.498:1 against the highlight background, which falls marginally short of the 4.5:1 requirement.
1.4.4 Resize text (Level AA)	Supports	The application fully supports Windows DPI scaling. When a user adjusts system display scaling up to 200%, the application's text and UI elements scale appropriately without clipping, truncation, or loss of functionality.
1.4.5 Images of Text (Level AA)	Supports	The application uses actual text rendered by the operating system for all UI elements rather than images of text, allowing it to be resized and read by assistive technologies.
1.4.10 Reflow (Level AA 2.1 and 2.2)	Supports	The application enforces a minimum window size that ensures all content remains visible and operable without requiring two-dimensional scrolling. The layout scales consistently when resized up to full screen.
1.4.11 Non-text Contrast (Level AA 2.1 and 2.2)	Supports	Visual information required to identify user interface components and states (such as highlight bounds and active selections) meets the minimum 3:1 contrast ratio.
1.4.12 Text Spacing (Level AA 2.1 and 2.2)	Not Applicable	As a desktop application utilizing standard operating system text rendering, the software does not use web-based markup that supports user-defined CSS text spacing overrides.
1.4.13 Content on Hover or Focus (Level AA 2.1 and 2.2)	Does Not Support	The application uses standard Windows tooltips on command bar icons. These tooltips cannot be

Criteria	Conformance Level	Remarks and Explanations
		dismissed via the keyboard (e.g., the Escape key) without moving the pointer, and the pointer cannot be moved over the tooltip content without the tooltip dismissing.
2.4.5 Multiple Ways (Level AA)	Not Applicable	The criterion is not relevant to the product. The application does not utilize web-style navigation.
2.4.6 Headings and Labels (Level AA)	Supports	Checkboxes, inputs, and sections within the application feature clear, descriptive text labels and headings that communicate their purpose.
2.4.7 Focus Visible (Level AA)	Supports	When navigating via the keyboard, a visible focus indicator (such as a focus box or outline) is provided for each actionable element, allowing users to clearly determine which control currently has keyboard focus.
2.4.11 Focus Not Obscured (Minimum) (Level AA 2.2 only)	Supports	When a user navigates via keyboard, the element receiving focus is never completely obscured by author-created content like floating dialogs or sticky headers.
2.5.7 Dragging Movements (Level AA 2.2 only)	Supports	While the application supports drag-and-drop functionality for adding files, it does not require it. Users can achieve the exact same result using a standard "Add files" button that operates via single pointer clicks or keyboard activation.
2.5.8 Target Size (Minimum) (Level AA 2.2 only)	Supports	The application uses standard Windows UI controls, which are reasonably sized and sufficiently spaced to prevent accidental activation.
3.1.2 Language of Parts (Level AA)	Not Applicable	The criterion is not relevant to the product. The application does not contain multi-lingual inline text.
3.2.3 Consistent Navigation (Level AA)	Supports	The application employs consistent layout, navigation elements, and iconography across all screens and dialogs.
3.2.4 Consistent Identification (Level AA)	Supports	UI components with the same functionality are identified consistently.

Criteria	Conformance Level	Remarks and Explanations
3.3.3 Error Suggestion (Level AA)	Supports	When an input error is detected (such as entering a duplicate profile name), the application provides a clear warning dialogue suggesting how to resolve the issue (e.g., prompting the user to make the name unique)
3.3.4 Error Prevention (Legal, Financial, Data) (Level AA)	Supports	The application modifies user data (files). To prevent accidental data loss, the software provides modes to back up files, displays explicit warnings before permanently overwriting original files, and utilizes the Windows Recycle Bin to allow users to recover overwritten files.
3.3.8 Accessible Authentication (Minimum) (Level AA 2.2 only)	Not Applicable	The criterion is not relevant to the product. The application does not require cognitive tests for authentication.
4.1.3 Status Messages (Level AA 2.1 and 2.2)	Partially Supports	The application successfully announces active processing states to assistive technologies (e.g., the progress overlay dialog text). However, upon returning to the results screen, the final visual status indicators (such as success or specific error reasons) are not automatically announced by screen readers without the user manually navigating to them.

Table 3: Success Criteria, Level AAA

Notes:

Criteria	Conformance Level	Remarks and Explanations
1.2.6 Sign Language (Prerecorded) (Level AAA)	Not Applicable	The criterion is not relevant to the product. The application does not contain prerecorded multimedia.
1.2.7 Extended Audio Description (Prerecorded) (Level AAA)	Not Applicable	The criterion is not relevant to the product. The application does not contain prerecorded multimedia.
1.2.8 Media Alternative (Prerecorded) (Level AAA)	Not Applicable	The criterion is not relevant to the product. The application does not contain prerecorded multimedia.

Criteria	Conformance Level	Remarks and Explanations
1.2.9 Audio-only (Live) (Level AAA)	Not Applicable	The criterion is not relevant to the product. The application does not contain multimedia.
1.3.6 Identify Purpose (Level AAA 2.1 and 2.2)	Not Evaluated	The product has not been evaluated against the criterion.
1.4.6 Contrast (Enhanced) (Level AAA)	Not Evaluated	The product has not been evaluated against the criterion.
1.4.7 Low or No Background Audio (Level AAA)	Not Applicable	The criterion is not relevant to the product. The application does not contain background audio.
1.4.8 Visual Presentation (Level AAA)	Not Evaluated	The product has not been evaluated against the criterion.
1.4.9 Images of Text (No Exception) (Level AAA)	Not Evaluated	The product has not been evaluated against the criterion.
2.1.3 Keyboard (No Exception) (Level AAA)	Not Evaluated	The product has not been evaluated against the criterion.
2.2.3 No Timing (Level AAA)	Not Applicable	The criterion is not relevant to the product. The application does not contain timed sessions.
2.2.4 Interruptions (Level AAA)	Not Applicable	The criterion is not relevant to the product. The application does not contain unexpected interruptions.
2.2.5 Re-authenticating (Level AAA)	Not Evaluated	The product has not been evaluated against the criterion.
2.2.6 Timeouts (Level AAA 2.1 and 2.2)	Not Applicable	The criterion is not relevant to the product. The application does not contain timed sessions.
2.3.2 Three Flashes (Level AAA)	Not Applicable	The criterion is not relevant to the product. The application does not contain flashing elements
2.3.3 Animation from Interactions (Level AAA 2.1 and 2.2)	Not Evaluated	The product has not been evaluated against the criterion.
2.4.8 Location (Level AAA)	Not Evaluated	The product has not been evaluated against the criterion.
2.4.9 Link Purpose (Link Only) (Level AAA)	Not Evaluated	The product has not been evaluated against the criterion.
2.4.10 Section Headings (Level AAA)	Not Evaluated	The product has not been evaluated against the criterion.

Criteria	Conformance Level	Remarks and Explanations
2.4.12 Focus Not Obscured (Enhanced) (Level AAA 2.2 only)	Not Evaluated	The product has not been evaluated against the criterion.
2.4.13 Focus Appearance (Level AAA 2.2 only)	Not Evaluated	The product has not been evaluated against the criterion.
2.5.5 Target Size (Level AAA 2.1 and 2.2)	Not Evaluated	The product has not been evaluated against the criterion.
2.5.6 Concurrent Input Mechanisms (Level AAA 2.1 and 2.2)	Not Evaluated	The product has not been evaluated against the criterion.
3.1.3 Unusual Words (Level AAA)	Not Evaluated	The product has not been evaluated against the criterion.
3.1.4 Abbreviations (Level AAA)	Not Evaluated	The product has not been evaluated against the criterion.
3.1.5 Reading Level (Level AAA)	Not Evaluated	The product has not been evaluated against the criterion.
3.1.6 Pronunciation (Level AAA)	Not Evaluated	The product has not been evaluated against the criterion.
3.2.5 Change on Request (Level AAA)	Not Evaluated	The product has not been evaluated against the criterion.
3.3.5 Help (Level AAA)	Not Evaluated	The product has not been evaluated against the criterion.
3.3.6 Error Prevention (All) (Level AAA)	Not Evaluated	The product has not been evaluated against the criterion.
3.3.9 Accessible Authentication (Enhanced) (Level AAA 2.2 only)	Not Applicable	The criterion is not relevant to the product. The application does not contain cognitive authentication processes.

Legal Disclaimer (Neuxpower)

This Accessibility Conformance Report represents the good faith efforts of Neuxpower to evaluate the accessibility of NXPowerLite Desktop against the specified WCAG guidelines as of the date of publication. Testing was conducted to the best of our ability using manual evaluation methods, standard assistive technologies, and industry-standard accessibility inspection tools.

While we strive to provide a comprehensive and accurate assessment, accessibility testing can involve subjective interpretation, and some discrepancies may naturally occur. Any errors or omissions in this document are entirely unintentional. Should we be made aware of any inaccuracies or previously unidentified accessibility barriers, Neuxpower is committed to re-evaluating the application and re-issuing an updated version of this report.
